

Powering The New Millennium

Universal Copper Ltd. is a Canadian-based copper exploration company focused on the acquisition and exploration of **copper** properties.

Our objective is to build shareholder value through the acquisition of projects with significant technical merit. The Company's management team has many years of experience in exploration, finance and efficient public company management.

Gachala Copper Project

Gachala Copper Project

100% owned Gachala Property applications encompass an area of 13,280 hectares and cover 48-line kms of the 250km by 120km belt of Devonian Cretaceous rocks in a geological setting conducive to hosting sedimentary deposits, thought to be analogous to the Zambia Copper Belt of Africa.

Claims adjacent to the west returned grades from 1.6% to 7.82% Cu in 12 of 47 samples taken.

Historic 4km long anomaly was identified on the west

Exploration In Progress

- Complete historical data compilation for entire 250km belt
- Evaluate and prioritize current assets utilizing planned LWIR survey
- Evaluate, prioritize and acquire additional assets utilizing geology and LWIR
- Complete surface exploration and follow up trenching programs in advance of drilling

2019 Operating Budget

Property Acquisition	\$250,000
Exploration	\$1,000,000
General & Admin	\$240,000
Investor Relations	\$240,000
Cash Reserve @ Dec 31st 2019	\$500,000
Total Operational Budget	\$2,230,000
Less Current Cash	\$-50,000
New Financing	\$2,180,000

Poplar Project

The Poplar Project spans 65,817 hectares and is traversed by a 138 Kva power line and mostly accessible by road. The property is located in a historic mining area, only 35km from the Huckleberry Mine and 42km from Equity Silver. The property is also accessible via rail – only 88km to Houston or 400km to a port at Prince Rupert.

Poplar Project

Typical snowfall consists of 150cm on an annual basis, making year round work possible.

2019 Proposed Work Program

- Follow up on excellent November 2018 drill results with further drilling
 - Continue testing to depth
 - Test strike extensions indicated by previous deep IP survey
- Begin systematic evaluation of historic sampling, Airborne EM and LWIR
 - Initially focus on coincidental anomalies and historic sampling for summer 2019 drilling program
- Metallurgical sampling
